

Year 7 Catch Up Premium Outcomes and Provision 2016-17

The catch-up cohort for the 2015-2016 Academic Year was identified by those not achieving level 4 in English, maths or both. In this current Academic Year (2016-2017), the KS2 assessment system changed, with outcomes measured using a scaled score. A pupil's scaled score is based on their raw score (total number of marks a pupil scores in a test) and from this a scaled score is calculated to allow for comparison. A scaled score of 100 will always represent the expected standard on the test. Pupils scoring 100 or more will have met the expected standard, those below are deemed not to have met the expected standard. The literacy and numeracy catch-up premium gives schools additional funding to support year 7 pupils who did not achieve the expected standard in reading or maths at the end of key stage 2 (KS2).

As comparison between the two assessment systems is not possible, the Government agreed to match funding. For the last academic year 20 students did not reach this bench mark. Since funding for Catch-up premium is set to match the proportion of students this year we have identified the lowest 20 attaining students as requiring extra support through this funding. Following an analysis of CATs data with the previous cohort, it has been found that the current cohort of students are significantly weaker and there it is felt that the funding allocation is in effect a reduction in support. Although figures focus on the 20 students, the funding has been used to support a greater number of students than this.

Funding

Catch-up Premium	Amount
2015/16	£10,000
2017/18	£10,000

Context

Catch-up Premium profiles 2016-17	
Total number of year 7 students	199
Number of students eligible	19
Percentage of students eligible	9.5%
Average Scaled score (all students)	101.2
English catch-up average scaled score	90.2
Maths catch-up average scaled score	83.0

Given the difference in grading systems between KS2 national curriculum scaled score system and our own assessment point grades in year 7 (1-9 grades), measuring the progress of these students was achieved through the use of a KS2 conversion to the 1-9 scale and monitoring how Year 7 AP1 and Year 7 AP2 outcomes compared from this baseline.

Students identified as catch-up premium in English were given literacy support lessons led by the Inclusion department. This was instead of after school lessons in most cases or instead of MFL lessons. Students have been encouraged to read in i-space time and boxes of books of suitable challenge have been provided for the catch-up premium students. In Maths, students have benefited from the introduction of the Maths mastery course. The inclusion provided an extensive programme of in class support, focussing on the catch-up premium students as directed by teaching staff.
